

# Intergalactic Security Organization II

## Problem code: HS08ISO2

This is the off-line version of the problem: Intergalactic Security Organization.

There will be one test case with  $n$  close to 10 000, and  $m$  about 11 000.

The test case will be revealed at 12:00 on Saturday, March 14.

As a solution you must select some galaxies as locations of ISO and send as a text file following the format described in the original problem.

Submitted solutions will be judged after the end of the 5th contest series.

The number of points given in the ranking is scaled so that it is equal to 10 for the registered contestant whose solution has the highest score, and proportionally less for all solutions with lower scores.
